

STEEL WORKS INDUSTRY

Serving your Industry with Centrifugal Castings

CONTINUOUS CASTING

CONTINUOUS CASTING MOULDS
Material : pure Copper

POURING LADLE BUSHES
Material : High Tensile Brass

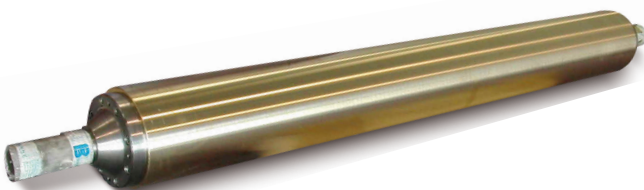

ROLLING MILL

ROUGH MACHINED SCREW DOWN NUTS
Material : High tensile brass, bronze, aluminium bronze

WIPER ROLLERS FOR COLD ROLLING OF ALUMINIUM AND STAINLESS STEEL
Material : Aluminium-bronze with high hardness

Please contact us for more specific products!

CENTRIFUGAL CASTINGS FOR STEEL WORKS AND ROLLING MILLS

Materials

- Bronze (Leaded Bronze, Tin Bronze)
- Aluminium Bronze
- Brasses
- Copper
- Stainless Steels
- Special Alloys

Delivery condition

- Rough machined
- Fully assembled and ready to be used

Sizes

- Large range of dimensions
- OD: from 60 mm up to 6000 mm
- Length up to 4500 mm
- Cast weight up to 20 T

Advantages of centrifugal casting by LBI

- Improved corrosion resistance
- High dimensional stability
- High mechanical properties
- Long-term supplier for market leaders

Applications

- Rolling mills
- Continuous casting production lines

Main customers

- ArcelorMittal Group
- C M I
- Fives Group
- Siemens
- ThyssenKrupp
- SMS Group

**CENTRIFUGAL CASTING SOLUTIONS FOR:
Energy, Pumps, Oil & Gas, Chemical,
Mining and Cement, Aeronautics,
Ship industry, Machine tools...**
